# Wild and Scenic Rivers and the Use of Eminent Domain

## INTRODUCTION

The Wild and Scenic Rivers Act (Act) establishes a national policy to protect certain of the nation's outstanding rivers, "with their immediate environments," in their free-flowing condition. Rivers included in the National Wild and Scenic Rivers System (National System) possess one or more "outstandingly remarkable scenic, recreational, geologic, fish and wildlife, historic, cultural or other similar values." Each river is to be "administered in such a manner as to protect and enhance the values which caused it to be included in said system. . . ." (Section 10(a)). This provision of the Act has been interpreted as requiring a "nondegradation and enhancement policy for all designated river areas" (*Interagency Guidelines*).

The Act provides federal agencies, state and local governments, and local citizens a valuable set of tools to protect outstanding rivers. Some of these tools are straight-forward and direct. For example, federally licensed hydroelectric projects are prohibited on all wild and scenic rivers and new mining claims and mineral leases are prohibited on federal lands in wild river areas. Other tools are not so obvious, such as the increasingly important and dynamic interplay between locally adopted zoning ordinances, cooperative agreements and comprehensive management plans to protect rivers flowing through private lands. Within limits, federal river-administering agencies can acquire land or interests in land.

Although eminent domain (condemnation)<sup>1</sup> has never been a prominent method of acquiring lands within wild and scenic rivers, and has almost ceased to be used after the early 1980s, it is still a contentious issue when rivers are being considered for addition to the National System. The purpose of this paper is to show how infrequently eminent domain has been used. Another technical paper in the *Wild and Scenic Rivers Reference Guide*, "Protecting Resource Values on Non-federal Lands," describes how and why land acquisition in general, and eminent domain in particular, are no longer prominent land protection tools.

---

<sup>1</sup> Eminent Domain: The governmental right to acquire private property for public use after payment of just compensation.

## STATUTORY BACKGROUND

The Act provides for limited authority to purchase interest in lands in order to protect river values on federally administered components of the National System. Boundaries (generally) are limited to no more than an average of 320 acres per mile, of which no more than an average of 100 acres per mile may be acquired in fee.<sup>2</sup>

Unless Congress specifies otherwise for a particular river, there are no limitations on the use of eminent domain to clear title or to acquire scenic or access easements<sup>3</sup> within river boundaries. There are, however, a number of limitations on the use of eminent domain to acquire fee title:

- Lands owned by a state may be acquired only by donation or exchange.
- Eminent domain cannot be used to acquire lands from an Indian tribe or political subdivision if they are following a plan for management and protection which the administering Secretary finds adequate.
- The use of eminent domain to acquire fee title is not allowed when over half the land in the boundary is in public ownership.
- Private lands within the boundary cannot be condemned if they are within any incorporated city, village, or borough which has in force and applicable to such lands a duly adopted, valid zoning ordinance that protects river values.

## FACTS CONCERNING THE USE OF EMINENT DOMAIN

The Bureau of Land Management (BLM) has condemned in fee only along New Mexico's Rio Grande. The U.S. Forest Service (USFS) has condemned in fee only along Missouri's Eleven Point River. The National Park Service (NPS) has condemned in fee along two rivers -- the St. Croix River (Minnesota/Wisconsin) and Tennessee's Obed River. The Rio Grande, Eleven Point, and St. Croix Rivers were among the original eight rivers included in the National System in 1968; the Obed was designated in 1976. The total acreage of condemned property in fee along these four rivers is 1,413 acres. The U.S. Fish and Wildlife Service (USFWS) has never used eminent domain to acquire fee title along a wild and scenic river (see Table 1).

---

<sup>2</sup> Fee: When all of the interests in land are acquired, it is owned in fee-simple.

<sup>3</sup> Easement: An interest in real property that conveys use, but not ownership, of a portion of an owner's property. Such "use" does not necessarily, or even customarily, include physical access. Instead, easements along wild and scenic rivers typically protect the public interest in the land's scenic and conservation values.

The BLM has condemned easements along Oregon's Rogue River and New Mexico's Rio Grande. The USFS has condemned easements along four rivers -- the Middle Fork Clearwater (Idaho), Eleven Point, Rogue, and Flathead (Montana). The NPS has condemned easements along the St. Croix and Obed Rivers. The total acreage of condemned easements on these eight rivers is 6,339.7 acres. The USFWS has never used eminent domain to acquire an easement for a wild and scenic river (see Table 2).

The following tables show how many acres the federal agencies have acquired via eminent domain on wild and scenic rivers, both in fee and easements. Although these figures demonstrate the relatively infrequent use of eminent domain, they may even overstate the negative aspects of its use. Though some view condemnation as a hostile action, it is not always so in practice. For example, condemnation is sometimes initiated in order to obtain a judicial determination of clear title to property. In these instances, it is a necessary prerequisite for the federal government to purchase property. In other instances, a condemnation action is initiated with a willing seller as a means to negotiate a purchase price in excess of the government's appraised value.

**Federally Administered Rivers<sup>4</sup> as of June 1998**

Table 1

<b>River and Public Law</b>	<b>State</b>	<b>Administering Agency<sup>5</sup></b>	<b>Mileage</b>	<b>Private Lands at Designation</b>	<b>Condemnation in Fee (Acres)</b>	<b>Condemnation of Easement (Acres)</b>
Middle Fork Clearwater (Public Law (P.L.) 90-542)	ID	USFS	185.0	Y	N/A <sup>6</sup>	1266 <sup>7</sup>
Eleven Point (P.L. 90-542)	MO	USFS	44.4	Y	657 <sup>7</sup>	2614 <sup>7</sup>
Feather (P.L. 90-542)	CA	USFS	77.6	Y	N/A <sup>6</sup>	0

Rio Grande (P.L. 103-242)	NM	BLM	12.0	N		
Rio Grande (P.L. 95-625)	TX	NPS	191.2	Y	0	0

<sup>4</sup> Under the Act, there is no federal authority for land acquisition on state-administered rivers (under Section 2(a)(ii)).

<sup>5</sup> Army Corps of Engineers (ACOE), Bureau of Land Management (BLM), National Park Service (NPS), U.S. Fish and Wildlife Service (USFWS), U.S. Forest Service (USFS)

<sup>6</sup> Not applicable (N/A) because condemnation is prohibited by (a) and/or (b):

- a) If 50% or more of acreage within the river area is in public ownership, condemnation in fee is prohibited under Section 6(b), and/or
- b) Condemnation is prohibited by special provision.

<sup>7</sup> See Table 2 for more detail.
