Hi Jennifer –

At the Protection Island Aquatic Reserve CSC meeting, we spoke about your concern about a mariculture lease in The Dungeness Wildlife Refuge. Birdie Davenport, the Aquatic Reserve Program manager has offered to speak to Sean Carlson and perhaps other parties involved about the situation. If you would please email or call Birdie - 360 902-1073 with the details, she will follow through on contacts (better to have the direct manager to manager exchange of information).

I am working on updating our permit and hope to have something ready to send to you tomorrow.
