Hi Jennifer,

Charlie asked me to review and edit your letter/documentation to the Jamestown S'kallam Tribe since Nicole is on leave through May 23. Had a few questions:

In 1983[MK1] the Ecological Services Field Supervisor also requested that "harvest only be allowed May 1 – September 30 to avoid the greatest waterfowl concentrations."

---

[MK1]Is this the correct date?

This lease agreement is currently in holdover status[MK1] and outlines shellfish activities that are small in scale and primarily experimental in nature.

---

[MK1]What does this mean? Is the term expired, or has the lease been renewed?

The applicant's willingness to provide a 25" buffer[MK1] from eelgrass beds will largely avoid effects to currently identified eelgrass beds, however a 2016 eelgrass survey jointly conducted by the Refuge and Jamestown S'Klallam Tribe (Tribe) staff identified eelgrass turions outside of the identified eelgrass area.

---

[MK1]25 inches? Is this correct?

Great questions. See responses in [blue](#) below

In 1983[MK1] the Ecological Services Field Supervisor also requested that "harvest only be allowed May 1 – September 30 to avoid the greatest waterfowl concentrations."

---

[MK1]Is this the correct date? Yes. The letter was written on March 31, 1983. During our most recent meeting with Jamestown S'Klallam Tribe they made mention that the Service had never had issues with use of this site prior to them taking it over. I thought it would be good to include a comment pre-JST-ownership to "respond" to that inaccuracy. There are more examples, but these seemed like a good sample.

This lease agreement is currently in holdover status[MK1] and outlines shellfish activities that are small in scale and primarily experimental in nature.

---

[MK1]What does this mean? Is the term expired, or has the lease been renewed? Good question. It is DNR's way of holding the lease for the Tribe while they go through the permit process. I don't know if it has officially "expired" or not (although the expiration date of the last signed lease agreement was set for July of 2017). The Tribe requested that we use this verbiage during the last comment submission, so I thought it was best to keep using it. If you need to know more, give me a call.

The applicant's willingness to provide a 25" buffer[MK1] from eelgrass beds will largely avoid effects to currently identified eelgrass beds, however a 2016 eelgrass survey jointly conducted by the Refuge and Jamestown S'Klallam Tribe (Tribe) staff identified eelgrass turions outside of the identified eelgrass area.

---

[MK1]25 inches? Is this correct? No it is 25ft. Good catch!
