Subject: Initial list of scoping topics for discussion tomorrow
Date: Thursday, May 5, 2022 1:02:14 PM

Hello everyone,

My apologies for not sending this out earlier, but here is an initial list of potential topics to include in the upcoming EIS scoping notice (currently scheduled to be issued in early July). Please take a look and let us know your thoughts, and we can discuss in more detail during our standing call tomorrow:

- Possible impacts of proposed experimental population to source populations of gray wolves in Colorado
- Potential threats to the proposed experimental population
- Geographic area, release locations, likelihood of migrations, and # of animals released
- Management restrictions or special management
 - Injurious take
 - Non-injurious take
 - Threats to human health and safety
 - Defense of property (domestic livestock, dogs, etc.)
 - Reduction of depredation on ungulate populations
 - Take of wolves "in the act" and development of trigger criteria
 - Take of chronically depredating wolves and development of criteria/decision trees
 - Authorization of take - agencies and roles and responsibilities
- Provisions for adaptive management and periodic review of reintroduction program

Thanks in advance for your input and consideration, and looking forward to catching up with everyone tomorrow.
