Subject: Chap 4 comments and corrections relative to 3 sp. modelling
Date: Tuesday, June 18, 2013 11:44:09 AM
Attachments: [5-28-13 Farallones Public DEIS with out appendices RB comments Ch4 only.docx](#)
Importance: High

Hi there,

Ok here is my last big submission to the EIS process. The whole document is here but I am addressing 2 things that were outstanding for me

- 1) Chapter 4 comments. I have a lot of them. It will be great to see them incorporated. Some are small and others are more substantial that will require some writing additions – i.e. in all the discussions of climate change impacts there is nothing about climate change impacts on the food web
- 2) I went throughout the document and made changes to reflect changes made to the 3 species model. This means changes in several chapters. This is less of an issue for the PVA as results didn't change. The references to these reports are a mess. I did that making these reports 2013, but I think they were already a mess – as the 3 sp. Is cited as a separate report while PVA is cited as both an appendix and a separate citation, but is not listed in the references. We'll need to sort that out.

Thanks

Russ
