Marge - I am not aware that we do at SF Bay, and coincidentally this Humboldt issue came up in staff mtg this morning because Doug is sending our Farallon mouse eradication rodenticide talking points to those folks to help craft a response, so I would have thought if we did use avicide, someone would have brought it up. I am copying John here in case I'm wrong.

---

This article mentions that your refuges use avicides to control corvids. Is that accurate?

[Supes delay decision on Clam Beach bird poisoning proposal;](#)  
[GoLocal campaign to launch Nov. 1 in Humboldt](#)  
[Megan Hansen/The Times-Standard](#)

A proposal from the U.S. Fish and Wildlife Service to poison predatory birds that are

harming the snowy plover population on Clam Beach was met with hesitation Tuesday by the Humboldt County Board of Supervisors.
