---

Hi Gerry and Jonathan,

I meant to send this to you earlier but got caught up in some other projects. Gerry I incorporated your last round of comments and changed the reporting of salamanders/m2 instead of /cm2 to make the data more “readable”.

We have finished up the 2015 salamander rain year and I am in the process of updating the excel files to include the entire time period for the final report due in September. I will be working on this on and off over the summer to get it into the format and shape we discussed at the meeting.

Here is a quick breakdown of my island time as and FYI:

On island: 30 May – 28 Jun (4 weeks)

Off island: 29 Jun – 10 Jul (2 weeks) – will be in the Petaluma office during this time

On island: 11 Jul – 8 Aug (4 weeks)

Off island: 9 Aug – early/mid Dec (~ 4 months) – I will be taking vacation time in August once I get off the island otherwise I should be in the area

Thanks and hope you two are doing well,

Ryan
