Gerry,

Here is the recommended matrix for collating Scoping comments.

Brad

**Subject:** Compiling Farallones scoping comments - template & examples

Dan et al:

Attached, Lillie put together a basic template that FWS can use to compile comments from the ongoing Farallones scoping period.

- FWS should come up with a comprehensive list of "issue categories" with which to populate this template.
- The column "included in DEIS?" should not be filled out at this time (we can fill it out once the DEIS has been completed)
- I would recommend that FWS use the two example "scoping reports" attached here as additional guidance.

If you have any questions or comments, please let me know.

Respect,

Jacob
