Jonathan:

This draft report attached is likely going to need to be finalized soon by Bruce, for inclusion in the EIS.
Could you and Gerry (and Ed?) review it and see if any changes need to be made to it?

It would be wise as you review it to make a list of any mouse-eradication related maintenance issue that will need to be scheduled and funded in the next year, so they are done in time for the proposed eradication...(fall 2013?)

Thanks in advance,

Dan Grout

Dan-

You are welcome. Unfortunately, I noticed after sending this to you and Gerry that I failed to include a page (Next steps). So, here is the latest rough draft. My apologies for any confusion and inconvenience.

Have a good weekend

Bruce

RE: Farallon rodent structure
assessment

Bruce-

Thanks much for the draft report. I appreciate you getting it out in whatever form this week.
I will read it when I can this weekend, as I'm finishing up my own draft

report today for the bait trial plan.

I'll be on the island most of November (1st through ~23rd), so if you have any questions feel free to email me and I'll get back to you. I would appreciate a copy of the CD as well. Thanks for your help. I look forward to talking with you soon.

-Dan Grout

Hi Dan and Gerry,

I hope all is well. Attached is a draft copy of the assessment report for the Farallons. (If I did not send this as a draft it would not get out this week, so I apologize for the quality in advance, along with any errors and the fact I did not yet include the reference page) . My apologies that it has taken so long to get this too you, but I have had several high priority issues I have had to address, including 30 plus raccoons running through an outdoor education school in the park during the middle of the day that has taken a lot of my time. Please do not hesitate to let me know of any changes you would like me to make and if there is additional information you would like me to include or if you have any questions.

I have had to rework the report a couple of time do to the size of some of the photos (our e-mail system limits the size of some document that I can send). I took a number of the photos out to reduce the size. However, I am putting together a series of files building by building files of the deficiencies that I have so far found and will be sending that on a CD to Gerry, Dan, if you would like a copy also, please let me know. I hope to get that in the mail latter today.,

Thanks for your patience

Bruce
