Hi Gerry, Attached is the new/latest version of the final report (Ver5). I incorporated your suggestions and they were all good ones. But please take a look at the last paragraph of the results section—it is highlighted in yellow. This is where I addressed the “contaminated” samples. See what you think of it. I will also run this by the chemist who did the residue analyses and put the chem report together, but he is on family vacation until the latter part of next week. Hope you are enjoying your time off! Later, Gary
