A quick update on the bitterroot grizzlies. We came close . Last couple days in August (b) (6), (b) (7)(C), (b) (7)(F) had them entering a baited culvert trap. But we didn't set because of the Lincoln grizzly depredation. They moved out of tie chute Creek and (b) (6), (b) (7)(C), (b) (7)(F) eventually located them aging the other day in Carlton Creek, got a bait out, but it appears they have now moved on. At this time we do not know their location.

JJ

In the Blackfoot we have a female grizzly with one yearling
