Nice work! What are your thoughts at this point?

Lori Roberts

Let me know which collars and I will check they was working. Just listen for double beeps.

[REDACTED] is leaving the trapped bear, with water, at site with two additional culvert traps set at site with the hope of snagging the 2nd sibling. Note, Last night the other trap had been sprung by black bear earlier in the evening.. The sibling spent the night with its trapped sibling and was last seen on camera at 6:45 AM.
